

B360 — PLAYER INTELLIGENCE

# NICK BÄTZNER

Left Winger — SC Paderborn 07 (2. Bundesliga)

26 Years · 1.76 m · Contract until 30.06.2028

„He changes the game before he ever touches the ball.“

## PLAYER IDENTITY

- ✓ Space Manipulator
- ✓ Third-Man Specialist
- ✓ Final-Third Connector
- ✓ High-Intensity Runner
- ✗ Ball-Dominant Playmaker
- ✗ Isolation Dribbler

Value created through positioning and timing — not ball dominance.

1,390 Min · 2. Bundesliga 25/26 · SkillCorner + Twelve Data

## THE ACTUAL STORY

### Listed as a Left Winger. Profiled as a Raumdeuter.

*Raumdeuter — a space-manipulating attacking midfielder who creates value through positioning, not ball possession.*

*The market sees:* a squad-rotation left winger valued at €500K.

**B360 sees:** one of the league's strongest off-ball availability profiles — a player defenders must constantly adjust to, even without a pass being played.

## WHAT DOESN'T ADD UP

- 98–99th pct. presence between the lines — rarely without an option
- Defenders adjust to him even without a pass played (90th pct.)
- 93rd percentile Sprint Count — elite physical profile
- Contract security through 2028
- Labeled and used primarily as a left winger
- Same identity, far less pronounced when played wide
- Deliberately low involvement — 4th pct. on-ball touches

## CURRENT MARKET VALUE

€500K

*That disconnect between the position he's listed in and the position his data actually lives in is exactly where smart recruitment creates an advantage.*

## WHAT THE DATA PROVES

# A Central Identity, Not a Wide One.

### ELITE AVAILABILITY BETWEEN THE LINES — AS CENTRAL MIDFIELDER

Option Through Last Line Per 30 TIP **99.**

Option Around Last Line Per 30 TIP **99.**

Option Around Second Last Line Per 30 TIP **99.**

Option Through Second Last Line Per 30 TIP **97.**

Option Through The Lines Per 30 TIP (Overall) **98.**

*Measured across his central midfield / attacking midfield minutes this season (vs. 102 2. Bundesliga midfielders). The same movements appear in his wide-forward minutes, but far less pronounced — around the 70th–80th percentile rather than high-90s.*

### DISRUPTS DEFENSES WITHOUT THE BALL

Beaten By Possession Percentage **99.**

Affected By Movement Percentage **90.**

Runs In Behind Per 30 TIP **93.**

Overlap Runs Per 30 TIP **92.**

*Defenders constantly adjust to him, even without a pass being played — not through pressing or duels, but through constant relocation. On-ball involvement is deliberately low (4th percentile Possessions Per 30 TIP): he creates value by relocating defenders before the ball arrives, not by receiving it.*

Honest scope: progressive-action ratio under pressure sits at the 11th percentile — he is not the player who carries the team through a press. His value is positional, not ball-carrying.

## THE OPPORTUNITY

# Where This Profile Creates Immediate Value.

### TACTICAL FIT

#### BEST SUITED FOR

- ✓ 4-2-3-1 as a free No.10
- ✓ 4-3-3, left-sided No.8
- ✓ Inverted left winger, freedom to tuck inside
- ✓ Two-striker system, in the pocket underneath

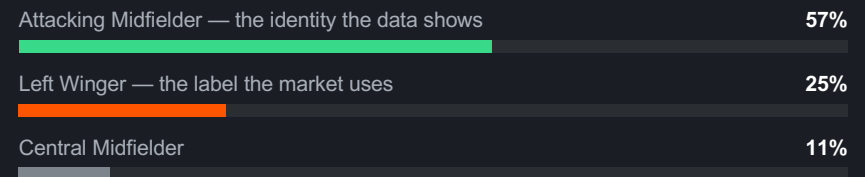

#### AVOID IF

- ✗ Team needs genuine winger isolation on the touchline
- ✗ Team needs a progressive ball-carrier out of pressure
- ✗ System builds possession exclusively through him

### WHY THE MARKET IS INTERESTING NOW

- Positional mislabeling suppresses visibility — filed as a left winger, not scouted for his central profile
- Contract running to 2028 removes urgency from public market pricing

#### MINUTES BY POSITION THIS SEASON

## THE BOTTOM LINE

***The market is buying a winger. The data describes a central space manipulator. Those are not the same player.***
