DEVELOPMENT TRAJECTORY

- Plus-Minus rating climbing steadily across the season (~11 to ~40)
- 2,369 minutes — his first season carrying regular senior-level responsibility
- Technical foundation (build-up, press-breaking) already at a level associated with higher competitions
- Contracted through 06/2027 — runway to keep developing

Development focus: becoming more dominant in proactive defending and aerial duels. The technical foundation is already in place; the next step is defensive assertiveness.

IDEAL FOR CLUBS THAT

- Build patiently from the back
- Value progression through central defenders
- Play with a proactive first phase
- Invest in emerging first-team starters

MARKET INSIGHT

Academy products from Bundesliga clubs who have already turned professional rarely become available on a free transfer before establishing themselves in senior football.

B360 ASSESSMENT

Schopper already shows build-up qualities typically associated with higher levels. His market value reflects his current competition level, not his underlying profile. For clubs seeking a progressive centre-back with immediate upside and resale potential, this is the point in his development cycle where the market still prices potential rather than performance.

THE ARGUMENT IN ONE SENTENCE

A free-transfer opportunity to acquire a Bundesliga academy product already on a professional contract before his performance level is reflected in his market value.
