DEVELOPMENT TRAJECTORY

- First full season of senior professional football — at 22
- A full, uninterrupted starter campaign (2,430 minutes)
- Already demonstrating elite composure metrics despite still being several years away from a centre-back's typical peak
- Still under a long-term Bundesliga contract (2028) — development upside, no ownership risk

Consistency over spectacle. He prevents danger consistently rather than relying on highlight interventions — a defender who disrupts danger early and often, without needing outlier numbers to prove it.

Elite composure in tight spaces (91st) is the standout — exactly the profile a left-footed, build-up-first centre-back needs to anchor possession under pressure.

THE OPPORTUNITY

A Rare Left-Footed Centre-Back. Available Now.

IDEAL FOR CLUBS THAT

- Build from the back
- Play with a left-footed centre-back
- Value composure under pressure
- Need immediate reliability

MARKET INSIGHT

Left-footed centre-backs remain one of the scarcest profiles in the current market, making proven options particularly difficult to acquire.

B360 ASSESSMENT

Zobel combines defensive consistency with composure in possession. Rather than standing out through spectacular defending, he consistently solves the first phase of possession while providing reliable defensive stability. For clubs looking for an immediate left-footed starter, he represents a rare loan opportunity with limited adaptation risk.

THE ARGUMENT IN ONE SENTENCE

A low-risk loan opportunity to secure one of the market's scarcest profiles — a proven, left-footed centre-back with Bundesliga pedigree and immediate first-team readiness.
